Education

Texas A&M University, College Station, TX — August 2019
Ph.D. Wildlife & Fisheries Sciences

Clemson University, Clemson, SC — May 2013
B.S. Biological Sciences (*Magna Cum Laude*)

Research Interests

I am broadly interested in the study of comparative biomechanics, trophic ecology, ecotoxicology, and movement ecology. By using an integrative approach to understand how organisms function within the scope of their environment, associations of physical performance can be used to assess ecological roles and resource use. I am interested in using habitat suitability models to evaluate the impact of environmental drivers on spatiotemporal patterns of short-term movements and long-term ranges of a species. Additionally, I like to extend the results of these analyses using R Shiny applications as potential decision-support tools as well as for basic data exploration. These analyses can then be used to inform conservation and management of species from an integrative perspective. I am particularly interested in using quantitative methods (e.g., non-parametric Bayesian models, hierarchical state-space models, mixed effects models, multivariate ordinations and clustering) to answer questions regarding an organism's ecology.

Research Experience

Postdoctoral Research: 2019 – Present
School of Forest Resources and Conservation, University of Florida
(Research Advisors: Dr. Denis Valle and Dr. Robert Fletcher)

- Development of novel Bayesian methods to discern latent behavioral states from animal biotelemetry data
- Geospatial analyses conducted on endangered snail kites (*Rostrhamus sociabilis plumbeus*) across Florida to assist decision-making related to conservation and management
- Development of a new method to characterize landscape resistance from biotelemetry data that incorporates habitat preference and time spent moving across the landscape

Dissertation Research: 2013 – 2019
Department of Wildlife & Fisheries Sciences, Texas A&M University
(Research Advisor: Dr. Christopher Marshall)

- Integrative study of sharks and their roles in coastal ecosystems over ontogeny by measuring bite force, trophic ecology, and conducting a risk assessment of major organic pollutants (PAHs and PCBs)
- Bayesian regression models were used to measure the scaling of bite force over ontogeny and metrics of trophic ecology (via stable isotopes) using R
- Multivariate statistics were implemented to analyze datasets of pollutants in shark liver and muscle tissue and to correspond these burdens with trophic ecology (via stable isotopes)
- Outlines of shark teeth were fit using elliptic Fourier analysis and analyzed by multivariate statistics to evaluate heterodonty over ontogeny and among tooth positions of a given species using R
- Outreach efforts were conducted to explain this ongoing research to local fishermen and undergraduate students

Water Quality Research Assistant: Spring 2018
Galveston Bay Foundation, Houston, TX

- Analysis of long-term (2011 – 2017) citizen science water quality data from Galveston Bay, TX to determine the effects of Hurricane Harvey as well as locations in need of remediation
- Evaluated relationships among water quality variables, conducted time-series analyses, and estimated spatiotemporal patterns with geographic information systems (GIS) in R
- Analyses included generalized linear mixed effects models (GLMMs), generalized additive models (GAMs), and autoregressive moving average (ARMA) models using R
- These findings were presented at Galveston Bay Foundation to employees and volunteers with a range of scientific backgrounds

Qatar Field and Ecological Modeling Experience: 2014 – 2018
Department of Wildlife & Fisheries Sciences, Texas A&M University
(Research Advisor: Dr. Christopher Marshall)

- The movement ecology of hawksbill (*Eretmochelys imbricata*) and green sea turtles (*Chelonia mydas*) was studied in relation to biophysical variables in the Arabian Gulf using Bayesian state-space models and mixed effects models (GAMMs) in R
- Remote sensing data were downloaded and extracted for each of the static and dynamic environmental variables included in the species distribution models, which were mapped using ArcGIS and R
- Seasonal utilization distributions were calculated and biophysical variables were used to determine drivers of latent transit and area restricted search behaviors

One Health Summer Research Exchange: Summer 2015
Center for Environmental & Human Toxicology, University of Florida
(Research Advisor: Dr. Nancy Denslow)

- Lab study of sheepshead minnow (*Cyprinodon variegatus*) exposure to Macondo crude oil and dispersant using real-time quantitative polymerase chain reaction (RT-qPCR)
- Measured expression of stress-related genes (superoxide dismutase, catalase) from brain tissue

Undergraduate Research: 2010 – 2013
Department of Biological Sciences, Clemson University
(Research Advisor: Dr. Richard Blob)

- Kinematic analysis of a Hawaiian climbing goby (*Sicyopterus stimpsoni*) comparing cranial movements during feeding and climbing behaviors
- Analyzed kinematic profiles of multiple variables to determine potential evolutionary relationship between superficially similar behaviors
- This research resulted in an oral presentation at a national conference and a publication

Teaching Experience

Teaching Assistant, Natural History of Vertebrates (MARB 315) 2014 – 2019
Texas A&M University at Galveston, Galveston, TX

Undergraduate Teaching Assistant, Vertebrate Biology (BioSci 307) 2012
Clemson University, Clemson, SC

Fellowships and Awards

University of Florida Informatics Institute Postdoctoral Fellowship 2019
Texas A&M University at Galveston Graduate Boost Fellowship 2017
Texas A&M University Doctoral Merit Fellowship 2013
College of Agriculture and Life Sciences Excellence Fellowship (Texas A&M University) 2013
College of Agriculture, Forestry and Life Sciences Senior Award (Clemson University) 2013
NSF Research Experience for Undergraduates (Clemson University) 2012
NSF Research Experience for Undergraduates (Rutgers University) 2011

Grants & Funding

Texas A&M University at Galveston – Department of Marine Biology Mini-Grants ($2500) 2014 – 2018
Erma Lee and Luke Mooney Graduate Student Travel Grant ($1000) 2015, 2017
Texas Sea Grant, Grants-In-Aid of Graduate Research ($1000) 2014

Service

Secretary, ESA Statistical Ecology Section 2020 – present

Professional Societies

Ecological Society of America
Society for Integrative and Comparative Biology
American Fisheries Society
